PROFESSIONAL SUMMARY

Associate Software Engineer with **1.2+ years of experience** building scalable web applications. Proficient in **JavaScript, React, Node.js, Express, and MongoDB**, with expertise in **performance optimization, clean architecture, and best coding practices**. Passionate about delivering innovative solutions and collaborating in **agile teams** to drive high-impact projects.

TECHNICAL SKILLS

- **Languages:** HTML, CSS, JavaScript (ES6+), TypeScript
- **Frameworks and Runtime:** Node.js, Express.js, React Native, GraphQL
- **Libraries and Tools:** React.js, Redux, React Router, Mongoose, Tailwind CSS, Ant Design (Antd), Recharts, Prisma ORM
- **Databases:** MongoDB, MySQL, PostgreSQL
- **Developer Tools and Deployment:** Git, VS Code, Postman, Vercel

EXPERIENCE

Associate Software Engineer Mar 2025 – Present
Hashlogics *Lahore, PK*

- Designed and developed scalable, high-performance web applications using React, TypeScript, Node.js, and PostgreSQL, ensuring clean architecture and long-term maintainability.
- Engineered and optimized backend services with Express.js and Prisma ORM, streamlining complex data operations and improving API response times.
- Implemented secure RESTful APIs with JWT authentication and role-based access control (RBAC) to enhance data security and user management.
- Built responsive, intuitive user interfaces with React.js and modern UI libraries, improving cross-device user experience and engagement.

Mern Stack Developer Nov 2024 – Feb 2025
Freelance Project (School Management System) *Remote, PK*

- Designed and developed a comprehensive School Management System using the MERN stack to enhance operational efficiency for educational institutions.
- Implemented secure user authentication and role-based access control for various stakeholders, including administrators, teachers, students, and parents.
- Developed RESTful APIs for seamless CRUD operations, including student records, attendance, and grade management.
- Built a React Native mobile application to provide users with features like attendance tracking, notifications, and real-time grade access.
- Designed and integrated an analytics dashboard for real-time reporting using dynamic chart libraries.

Front-end Developer Intern Jun 2021 – Sep 2022
The Social Face *Lahore, PK*

- Created responsive and interactive user interfaces using HTML, CSS, JavaScript, and Bootstrap.
- Seamlessly integrated RESTful APIs to enable dynamic data exchange between the front and back end.
- Designed and developed reusable UI components, contributing to modular and maintainable code.
- Ensured optimal performance and user experience across various devices through responsive design techniques.

PROJECTS

Gatherly - Event Management Platform

Tech Stack: *React, TypeScript, Node.js, Express.js, PostgreSQL, Prisma ORM, JWT, Tailwind CSS, Vercel*

- Developed a full-stack event management platform enabling users to create, schedule, and manage events with secure authentication and real-time updates.
- Built a high-performance backend using Node.js, Express.js, and Prisma ORM, ensuring scalable data handling and efficient database queries.
- Implemented JWT-based authentication with role-based access control (RBAC) to safeguard user data and permissions.
- Designed a responsive, user-friendly frontend in React and TypeScript with intuitive dashboards for event creation, attendee tracking, and registration management.
- Deployed the application on Vercel, ensuring seamless CI/CD and optimized performance.
- [GitHub](#) | [Live Demo](#)

Wordwise - Location Marking App

Tech Stack: *React, React Router, Vite, JSON Server, React Leaflet API*

- Developed a location bookmarking app that allows users to save and organize journey locations with custom notes.
- Implemented user authentication and login functionality for secure access.
- Integrated the React Leaflet API to display interactive maps and mark locations dynamically.
- Stored and managed all user data using a mock JSON server for seamless testing and development.
- [GitHub](#)

Popcorn - Movies Rating and Reviews App

Tech Stack: *React, JavaScript, CSS*

- Built a responsive movie search and watch list application leveraging IMDB's Open Source API to fetch real-time movie data.
- Enabled users to add movies to a personal watch list, rate them, and manage preferences.
- Implemented local storage to persist user ratings and watchlist data across sessions.
- [GitHub](#)

EDUCATION

The University of Lahore

Bachelor of Computer Science - CGPA: 3.29/4.00

Lahore, PK

Feb. 2020 – Jan 2024

Govt. Islamia College Civil Lines

Intermediate in Computer Science

Lahore, PK

Aug. 2016 – May 2018

CERTIFICATIONS

- React.js - NamasteDev (Instructor: Akshay Saini)
- Node.js - NamasteDev (Instructor: Akshay Saini)
- MongoDB – Udemy (Instructor: Maximilian Schwarzmüller)
- JavaScript – Udemy (Instructor: Jonas Schmedtmann)
